1 Data dictionary

This section provides definitions of all metrics used in the analysis, organized by data source.

doctor_visits_past_year: Routine checkup within the past year among adults.

1.1 CDC PLACES: Routine Checkup Within the Past Year Among Adults

Primary Outcome Variable

1.1.1 Metric: Routine Doctor Visit Rate

- **Full Name:** Percentage of adults aged 18 and older who reported having a routine checkup within the past year
- **Variable Name** (in cleaned data): `doctor_visits_past_year`
- **Data Type:** Percentage (0-100)
- **What It Measures:** Healthcare utilization rate; the proportion of the adult population that accessed preventive healthcare services through routine medical checkups
- **Geographic Levels:** County, ZIP Code Tabulation Area (ZCTA), and Census Tract
- **Temporal Coverage:** Data years 2018-2023 (released in 2020-2025 respectively)
- **Source:** Behavioral Risk Factor Surveillance System (BRFSS) survey data collected by CDC
- **Frequency:** Annual (one observation per geographic unit per year)
- **Additional Metadata Included:** Total population, state, location identifiers

1.2 Census: SDOH data

- pct_white: B02001_002E / B02001_001E
- pct_black: B02001_003E / B02001_001E
- pct_asian: B02001_004E / B02001_001E
- pct_two_plus: B02001_008E / B02001_001E
- pct_other_race: B02001_007E / B02001_001E
- pct_hispanic_latino: B03003_003E / B03003_001E
- pct_non_hispanic_latino: B03003_002E / B03003_001E
- pct_naturalized: B05001_005E / B05001_001E
- pct_non_citizen: B05001_006E / B05001_001E
- pct_citizen: 1 - B05001_006E / B05001_001E
- median_household_income: B19013_001E
- pct_below_poverty: B17001_002E / B17001_001E
- pct_bachelors_plus: (B15003_022E + B15003_023E + B15003_024E + B15003_025E) / B15003_001E
- pct_high_school_or_higher: (B15003_022E + B15003_023E + B15003_024E + B15003_025E + B15003_017E) / B15003_001E
- pct_unemployed: B23025_005E / B23025_003E
- pct_rent_burdened_30_plus: (B25070_007E + B25070_008E + B25070_009E + B25070_010E) / B25070_001E
- pct_no_internet: B28002_013E / B28002_001E
- pct_no_vehicle: B08201_002E / B08201_001E

1.3 TRAC Detention Facilities Data (2019-2026)

Immigration Enforcement Intensity Metrics

1.3.1 Metric 1: Average Daily Population (ADP)

- **Full Name:** Average Daily Population at ICE Detention Facilities
- **Variable Name** (in cleaned data): `average_daily_population` (or similar)
- **Data Type:** Count (number of individuals)
- **What It Measures:** The average number of individuals detained on any given day at a specific ICE detention facility; a measure of detention facility utilization and enforcement intensity
- **Geographic Level:** ZIP Code (facility location)
- **Temporal Coverage:** September 30, 2019 - February 5, 2026 (multiple time points)

- **Source:** TRAC (Transactional Records Access Clearinghouse), retrieved March 19, 2026
- **Frequency:** Periodic snapshots (specific dates, not continuous daily data)
- **Additional Metadata Included:** Facility name, state, zip code, current date

1.3.2 Metric 2: Current Guaranteed Minimum (dropped)

- **Full Name:** Current Guaranteed Minimum Detainee Population
- **Data Type:** Count (number of individuals)
- **What It Measures:** Minimum number of detainees that detention facilities are contractually obligated to maintain
- **Status:** Dropped during data cleaning due to excessive missing values
- **Note:** Not used in final analysis

1.4 Summary of Key Variables

	Primary				
Data Source	Metric	Unit	Geography	Time Period	Frequency
CDC PLACES	Routine doctor visit rate	Percentage (%)	County, ZCTA, Census Tract	2018-2023	Annual
TRAC Detention Facilities	Average daily population	Count	ZIP Code	Sept 2019 - Feb 2026	Periodic
TRAC ICE Detention	Monthly detention counts (by demograph- ics)	Count	County	Mar 2015 - Jul 2019	Monthly

1.5 Analysis Design Note

The primary analysis leverages the **CDC PLACES routine checkup rate** as the dependent variable (healthcare utilization outcome) and the **TRAC detention facilities average daily population** as the primary independent variable (immigration enforcement intensity), merged at the ZIP code and year level to create a panel dataset for regression analysis. The **TRAC ICE Detention demographic metrics** provide detailed subgroup analysis

capabilities to examine differential impacts across citizenship status, legal status, criminal history, and demographic characteristics.
